Hi [redacted]

Just had a look at some of the others that were in the same boat this morning. Its not showing up because people have only been ticking the platform category. You need to make sure you tick the stage and unit category too. Its because the stage category is the parent category – so it needs that to display the post. I have just edited your post and its fixed now:

Kind regards
Sarah

Subject: Re: Community Resource list not working correctly

Hi Sarah,

No, I never deleted them. They still show up in my activity profile and I can see them in the community resource page but the link to go to the actual resource is sort of broken(?).

Here's the link to the board where it should be visible (it's the Conway's game of life, Charlie Chaplin Factory work scene and What's it's like to be a bat? by Thomas Nagel)

<https://gcdcommunityresources.myblog.arts.ac.uk/category/stage-2/unit-6/u6-p1-information-systems/>

and here's the link to the actual posts

<https://gcdcommunityresources.myblog.arts.ac.uk/690/stage-2/unit-6/u6-p1-information-systems/21029475/>

for some reason it tries to link my profile and not the actual post?? and it's the same for the other 2 ones.

So sorry, I wasn't available yesterday. If possible could stop by today after 1pm today :)

Thank you!!

Hi [REDACTED]

Did you delete your posts?

Can you send me the text and a link you were trying to post?

Are you in college today? I can meet you before 1pm to see if we can figure out what is going on.

Thanks

Sarah

Subject: Community Resource list not working correctly

Hi!

I've been trying to make posts on the community resource list and they just don't seem to work correctly. They do show up on the website for me but you can't really open them and when you try they show up as non existing ones for some reason. Is there a way to fix that??

Best regards,
